-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 7 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Blazey et al (U.S. Patent 6,231,931 B1).

Blazey et al disclose a wooden substrate such as solid wood, plywood, fiberboard etc. coated with a first layer with an ultra violet curable coating composition and second layer formed over the first cured layer using an ultraviolet curable coating composition (col. 2, line 28 to col. 3, line 42). Blazey et al do not disclose claimed substrate with a press coat and claimed amounts of double bonds. However Blazey et al cures each layer by an ultraviolet light therefor after curing the presence of double bonds deemed to fall within claimed range unless shown otherwise. Blazey et al's first layer can be viewed as a primer coat and second layer can be viewed as a topcoat.

Therefore it would have been obvious to a person of ordinary skill in the art at the time of this invention made to make coated article as taught by Blazey et al. Application of first layer by a press coating is a process step and bears no patentable weight in absence of providing criticality of claimed press coat.

No claims are allowed
